1 INTRODUCTION

This document explains the COPiL \LaTeX class file for preparing COPiL articles/squibs. Authors are kindly requested to adhere the below guidelines as closely as possible so as to facilitate the editorial process.

2 DOCUMENT SETUP

Download all folder contents (.cls, .bst, .tex, .bib). The main .tex file of this template will call the document class copilv12. Please do not change this or remove any packages from the preamble. Please avoid adding additional packages unless necessary. Please do not change anything in the class (.cls) file.

3 SPELLING AND STYLE

Standard British and American spellings are both accepted, but please be consistent. You are responsible for checking spelling errors prior to submission. Please avoid contractions and informal style.

3.1 Titles and headings

The first letter of each content word in the main title should be capitalised. For sub-titles, only the first word and any proper names should be capitalised. Section and sub-section headings should follow the same format as main titles and sub-titles respectively (e.g. First Language Attrition and Syntactic Subjects: A study of Greek and Italian near-native speakers of English).

4 PUNCTUATION

Please use single quotation marks. Double quotation should only be used when for internal quotes inside quotes. Please also make sure to differentiate between

* Some thanks

opening (‘...’) and closing (...’) quotation marks. Punctuation should go inside quotation marks while footnotes should go outside, e.g. ‘...?’¹

5 DATA

5.1 Tables and figures

All tables and figures must be numbered and captioned. Captions should be under the table or figure and end in a full stop. For tables with a lot of text, we recommend the tabulary package. Leave out vertical lines in tables where possible. For empty table cells, use a single solid line (-).

5.2 Linguistic examples

Linguistic data in the running text should be italicised. If the in-text data is not in English, it should be followed by a gloss in quotation marks (e.g. *cane* ‘dog’). When pronunciation is relevant please use IPA transcription.

Please use the expex package for numbered examples. For judgements, please use the `\ljudge{}` command. Examples and translations should have a full stop and capitalisation. Gloss lines should not. Refer to examples in text as (1), (1, 2) or (1 - 3).

- (1) A preamble to an example with parts
 - a. A sub-example.
 - b. *Marco ama il gatto.*
Marco loves the cat

‘Marco loves the cat.’
 - c. *An ungrammatical example.

```
\pex A preamble to an example with parts
\ a A sub-example.
\ a
\beginl
\ gla Marco ama il gatto. //
\ glb Marco loves the cat //
\ glft `Marco loves the cat.'//
\endgl
\ a \ljudge {*} An ungrammatical example.

6 REFERENCES

You are encouraged to use BibTeX for your bibliography. The recommended citation style is APA and is also the default for this document. Please use the natbib package. Here are some example citations:

- [Tsimpli, Sorace, Heycock & Filiaci \(2004\)](#) (`\citet{Tsimpli2004}`)
- [Roberts \(1987, 2019\)](#) (`\citet{Roberts1987, Roberts2019}`)
- [\(Tsimpli et al. 2004\)](#) (`\citep{Tsimpli2004}`)
- [\(cf. Roberts 1987: 20-28\)](#) (`\citep[cf.][20-28]{Roberts1987}`)
- [Tsimpli et al.'s \(2004\) experiment](#) (`\citeapos{Tsimpli2004}`)
- Please do not use `\citeauthor{}` and `\citeyear{}`.

Use the `\autoref{}` command for all cross-referencing except to examples. For cross-referencing examples, please use `\ref{}` instead.

6.1 .bib file

- Capitalise the initial letter of every content word for all entries.
- Enclose non-initial capitalised letters in brackets, e.g. `title = {Structure and {B}eyond}`.
- Use en-dash (two hyphens) in page numbers, e.g. `page = {104 -- 131}`.
- Use a backslash for underline/underscores inside URL, e.g. `https://www.mml1.cam.ac.uk/files/copil_latex_guidelines.pdf`

ABBREVIATIONS

If you use any unconventional abbreviations (e.g. for glossing), please include a full list immediately before your references.
